DETAILED ACTION

Response to Amendment

1. The present Office action is made in response to the amendment filed on 8/20/2007. It is noted that in the amendment, applicant has made changes to the specification, the drawings and the claims. Regarding to the claims, applicant has canceled claims 21 and 22 and amended claims 23 and 24. There is not any claim being added. The pending claims 14-20 and 23-24 are examined in this Office action. Note that claims 1-13 were canceled in the pre-amendment of 2/21/2006.

Oath/Declaration

2. Regarding to the objection to the oath/declaration made in the previous Office action, applicant's arguments as provided in the amendment of 8/20/07, page 6, have been fully considered. After review the oath/Declaration with his supervisor, the objection to the Oath/Declaration is now withdrawn.

Drawings

3. The replacement sheets contained four sheets of figures 1-4, 5a-c and 6-7 were received on 8/20/07. These drawings are approved by the examiner.

4. The objections to the drawings as set forth in the previous Office action are overcome by the amendments to the figures as provided in the amendment of 8/20/07.

Specification

5. The lengthy specification which was amended by the amendment of 8/20/07 has not been checked to the extent necessary to determine the presence of all possible

minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

6. The objection to the specification as set forth in the previous office action is overcome by the amendments to the specification as provided in the amendment of 8/20/07.

EXAMINER'S AMENDMENT

7. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David J. Simonelli on 8/22/07.

8. The application has been amended as follows:

In the claims:

- a) In claim 14: on line 10, changed "the light" to --the ambient light--;
- b) in claim 23: on line 1, changed "(Original)" to --(Currently Amended)--; and
- c) in claim 24: on line 1, changed "(Original)" to --(Currently Amended)--.

Allowable Subject Matter

9. Claims 14-20, 23 and 24 are allowed.

10. The following is an examiner's statement of reasons for allowance:

The rearview mirror as recited in the independent claim 14 is patentable with respect to the prior art, in particular, the Pub. Nos. 2003/0043589 and 2002/0171954; the U.S. Patent Nos. 5,148,014 and 6,359,274 and the EP 705 734 by the limitations related to the sensor having light guide disposed between a housing and the sensor for guiding ambient light and glare light outside the housing to the sensor and a switching device for periodically disrupting the transmission of ambient light to identify a presence of the glare light so that the sensor creates a dimming signal upon the identification of the presence of the glare light to dim the electrochromic mirror. It is noted that a) the use of a sensor having light guide disposed between a housing and the sensor for guiding ambient light and glare light outside the housing to the sensor is disclosed in the Pub. No. 2003/0043589; 2) the use of a filter in front of an ambient sensor for attenuating the light is disclosed in the mentioned EP reference, or after an ambient sensor for attenuating the ambient light level signal is disclosed in the Pub. No. 2002/0171954; and 3) a switching system for controlling the reflectance of an mirror based on the signals from an ambient and a glare sensors is disclosed in the U.S. Patent Nos. 5,148,014 and 6,359,274; however, the cited art by itself or in combination does not disclose a mirror system having the following features: First, a sensor for sensing ambient light and glare light; second, a light guide disposed between a housing and the sensor for directing ambient light and glare light to the sensor; and third, a switching device for periodically disrupting the transmission of ambient light to identify a

presence of the glare light such that the sensor creates a dimming signal upon the identification of the presence of the glare light to dim the mirror as claimed in present independent claim 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

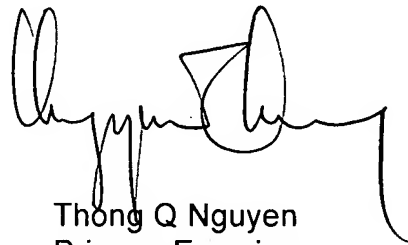

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference labeled as EP 705 734 has been lined-through because it has been considered and cited in the form PTO-892 which a copy was mailed to applicant with the Office action of 6/20/07. applicant should note that duplicate citation of references need to be lined-through to prevent any reference from being printed twice on the face of the patent should this application pass to issue.
